

# Fibre buffer

stripper CFS-2

Stripper CLASS CFS-2 is a high quality, professional tool for removing 2-3mm sheaths and acrylics from 250 $\mu$ m diameter fibres

The CLASS CFS-2 Stripper is a high quality, professional tool for removing 2-3mm diameter sheath from 125 $\mu$ m diameter fibres. In addition, the tool has a 1.98mm diameter hole, which allows the sheath of the cable to be cut, e.g. pigtails, patchcords. The stripper, thanks to its ergonomic design, is comfortable to use and accurately removes the buffer without damaging the fibre optic cable. It is possible to lock the stripper blades after use.

- Stripping of 250 $\mu$ m fibre sheath to 125 $\mu$ m diameter,
- Cutting opening of 1.98-3mm diameter.
