

Patch panel, slide-out FT 1U

19" 24XSC DUPLEX RAL9005

 **FiberTechnic**[®]

CE **PRODUKT
POLSKI**

ID: 4294

Fiber Optic Patch Panel 24xSC duplex is designed for mounting in 19" RACK cabinets and racks.

The slide-out switch allows easy and convenient way to manage optical routes at switch points, where the cables are completely terminated in the switchboard by organizing and welding fibers with pigtails on the welding trays. It has a pull-out (removable) drawer allowing easy access to its interior.

The whole is made of aluminum and powder coated in black which translates to lightness and a very aesthetic appearance.

The front panel is mounted to the drawer with the possibility of installing 24xSC duplex adapters. Inside the drawer there is a screw with a knurled nut for attaching one or two trays for welding.
