PRODUKT POLSKI

ID: 4408

Fiber optic patch panel 2U slide-out (telescopic) with panel for 48xSC duplex adapters is designed for mounting in 19 „RACK cabinets and racks.
It is used to organize fiber optic cables using pigtails. It has a sliding drawer on the guides enabling convenient access to its interior.

The whole is made of aluminum and powder coated.

The fiber optic patch panel is equipped with a front panel 2U 48xSC simplex closed in a drawer with latch handles.

Inside the drawer there is a screw with a knurled nut for attaching one to six tray for welding. The set also includes a fastening element for the FRP rod (from the kevlar) for a multitube cable.
