

## PA-2000 ADSS 9.5 - 13 mm

extraction holder

ID: 4752

PA-2000 aluminium extraction holder used for suspending round cables with outer diameter of 9.5-13 mm. The holder is mounted on CS100, CS1500 type brackets and pole hooks.

The complete holder consists of the following components:

- Link made of stainless steel with a mushroom type element for installation in the holder
- Body made of aluminum alloy for resistance to severe weather conditions
- Locking wedges made of thermoplastic material

Features/Application:

- Body: lightweight aluminum alloy of high quality and mechanical resistance and weatherproof, UV resistant.
- Locking wedge: thermoplastic material of high quality and mechanical resistance and weathering, UV resistant
- Handle rope: stainless steel
- Minimum breaking force: 15 kN
- Wide range of cable dimensions from 9.5 to 13 mm
- Tool-free assembly for quick and efficient installation
- Universal mounting realized with a bracket mounted on a pole substructure
