

Fiber Optic Cable W-VOTKSd

1J 0,9mm 9/125 ITU-T fiber G.657B3

Transparent Fiber Optic Cable W-VOTKSd 1J 0,9mm 9/125 ITU-T fiber G.657B3

GHOST W-VOTKSd cable - transparent „invisible” cable for indoor installation. Features: small diameter (0,9mm), big flexibility (bending radius - 5mm). To be used for installations on the edges and corners of buildings, thanks to the usage of G657B3 fiber. The G657B3 fiber is ideal for installations requiring a reduced bending radius, tightly molten into a see-through and durable against damage PA-12 (nylon) coating.

It's possible to mount the cable by hot-gluing which makes it non-noticeable. The cable is sold in 1km and 2km lengths, packed on plastic spools.

Type of fiber	G657B2
Package	rotating spool 1000m or 2000m
Weight	10kg
Coating material	Nylon (0,25)
Maximum tensile strength installation	60N
Cable diameter	0,9mm
