

# Panel with radial fan

to STZ Fibertechnic cabinets

Fan panel is dedicated to Exterior Fibertechnic Telecommunication Cabinets STZ, STZD series. The fan wiring is connected with a WAGO 2P quick release terminal connector, which allows quick connection of the power wires. Additionally, the panel is equipped with a sealing grommet for cables.

Technical features:

- Type: AC
- Fan type: radial
- Voltage supplier: 230V AC
- Fan dimensions: Ø190x70mm
- Power consumption: 76W
- Rated current: 0,35 A
- Fan productivity: 620 m3/h
- Noise level: 66 dBA
- Bearing type: double ball
- Speed: 2700obr./min
- Weight: 1.2kg
- Frequency: 50-60Hz
- Rotor material: thermoplastic
- Housing material: aluminium
- Connections: 4 wires
- Working temperature: -40...80°C
- Starting capacitor: 2 uf in set
- Diagonal hole spacing: 58mm

For proper fan working we recommend using the KTS-011 thermostat.
