

Outdoor distribution cabinet

22U STZ 600x600 IP54

This IP65 thermo-insulated outdoor cabinet finds its use in roads development projects. Suitable for traffic light control. Designed to be mounted on a pedestal, the cabinet's dimensions are 1040x477x340 mm.

Designed with safety of devices installed inside the cabinet, it serves as protection from the harmful effects of environmental factors as well as from unauthorised access.

It allows the installation of heating and cooling systems, ensuring the appropriate temperature conditions required for the equipment's safe work. The cabinet also ensures that the desired connections can be made and the necessary connectors and devices can be installed.

Key features:

- Height: 1040 mm
- Width: 477 mm
- Depth: 340 mm
- the door is equipped with internal galvanized hinges and a tilt handle activating the 4-point outside-cabinet locking mechanism
- door opening sensor
- 2x vertical rail for attaching TH rails
- Two-fan cooling panel forcing the airflow
- M5 filtering trays protecting inlet and outlet openings
- MOREK conduit with IP66 rating
- Compartment for documentation located on the inside of the door
- Optional door opening restrictor
